3) and Windows 8.1 (NDIS 6.4), however, i am unable to find appropriate NDIS info for Windows 10 as the NDIS version is not.. 5 is mentioned as in below link. However, i find that the main NDIS migration link in MSDN does not even talk about 6.. Hi Neil, Thank you for your response Thank for providing description of your computer.

I also downloaded the App for the display adapter from the windows store When I open the app and click on devices the request to "add wireless adapter" is not there.. 5. Do we have a version of NDIS that is 6.5 for Windows 10? On continuing my search in MSDN, I got a table that depicts the NDIS version for particular Windows type.

**ndis driver**

ndis driver, ndis driver windows 10, ndis driver jobs, ndis driver download, ndis driver for windows xp, ndis driver windows 10 download, ndis driver error, ndis driver training, ndis driver update, ndis driver linux, ndis driver latency, ndis driver windows 7

So, can you kindly clarify me on which version of NDIS is appropriate for Windows 10 and what are the NDIS porting steps to be followed.

**ndis driver error**

For an example it can be Intel, NVidia etc You have asked how I can find NDIS 6.

**ndis driver windows 10 download**

In order to provide the best platform for continued innovation, live no longer supports Internet Explorer 7.. 1 and Windows 10 I find that there is significant info for porting NDIS 6's drivers for Windows 8 (NDIS 6.. Connected the adapter the HDMI port and my TV displays the adapter saying it is ready to connect.. However, that table too did not mention the NDIS version for Windows 10! Kindly refer to the link for the same.. 40 and describes its major design additions NDIS 6.40 is included in the Windows 8.. 1 and Windows Server 2012 R2 and later operating systems The NetDMA interface is not supported in Windows 8 and Windows Server 2012 and later.. Hi Merry Christmas I have a Dell Vostro 3700 laptop running windows 8.1 Pro 32 bit.. My display adapter is Intel HD Graphics I just purchased a Microsoft windows display adapter so I can display what's on my computer to My HDTV.. Also, can anybody point me to an appropriate link for the same Thanks in advance, Karthik Badagana. c10c1156f
